

LyonSysBio: first call for abstracts

LyonSysBio is the yearly international conference organized by BioSyL the Systems Biology Alliance of Lyon (<http://www.biosyl.org/>).

Our goal is to promote exchanges between scientists from different disciplines (biology, mathematics, computer sciences, physics, social sciences) who are interested in the analysis of the wealth of data generated by modern biology, as well as the construction of the necessary modeling tools to gain system level thoughtful insights.

In 2017, the conference will be held from November 15th to 17th. Keynote lectures will be delivered by invited speakers, on state-of-the-art advances in various domains of Systems Biology (list available on the conference website).

In addition, the conference program leaves ample space for contributed talks and posters for which proposals are welcome. We wish to favor results from multidisciplinary works.

Please use the online system to submit a one-page abstract (maximum 500 words, in English) by October 10th, 2017: <http://lyonsysbio2017.sciencesconf.org>

To register and to submit an abstract, you will have to create a sciencesconf.org account by filling the on-line registration and submission forms (should you not have already one).

Please note that registration fees for non-students will be of 100 euros, and a Gala reception will be organized on November 16th. Let's party!

We are looking forward to welcoming you in Lyon for LyonSysbio 2017!

Olivier Gandrillon, on behalf of the local organizing committee.
